## Recent Work Experience

---

Computer Technician / Assembly and troubleshooting of robotic musical instruments

**Ragtime Automated Music 12/2003 – Present**

<http://www.ragtimewest.com> (*The website is not my work*)

(209)634-8475

Ragtime builds automated Roll operated and MIDI robotic musical instruments, including player pianos, banjos, guitars, accordions and steel drums. Most units have touch screen kiosks. I install and setup the software and hardware necessary to prepare PC's for installation in our units. This includes installing Windows, sounds cards, video cards, drivers, touch screens, and following the companies' installation specifications for standard settings.

I am in charge of production of several different products. The products I build include the guitar, banjo, and country-special in Paper Roll, or Electronic, MIDI operated styles. I train new employees on how to assist me to build parts and/or on how to build products from start to finish. The products I build can have between forty and eighty hours of work in them. For some projects I work independently from the time I receive the work order, and parts, until the product is complete.

**Skills required:** *Windows 98 and XP, Networking, Teamwork, Time Management, Customer Support, Patience, Electronics, Metal Fabrication, Welding, Production, Independence, Carpentry, Improvisation*

---

Web Designer / Developer / Administrator

**West Coast Super Comp Race Club 7/2006 - Present**

<http://www.wcscrc.com>

(209)605-7265

WCSCRC.com is a drag racing, race club that covers the entire west coast with over 60 members. I designed the layout and setup the database. Race car driver details, point standings, and sponsor details are all stored in the database. Per the client's request, I designed the site so the club could easily maintain and update their site, with little or no web skills.

**Skills required:** *PHP, HTML, CSS, MySQL, phpmyadmin, Acrobat, verbal communication, Photoshop*

---

Web Designer / Developer / Administrator

**Kern Racing 7/2006 - Present**

<http://www.kernracing.com>

KernRacing.com represents a local race member. The focus of the site is to attract sponsors.

**Skills required:** *PHP, Photoshop, Excel, Frontpage, HTML, CSS, Acrobat, verbal communication*
